NOTE:

Direction **N** NORTH or **S** SOUTH.

US 1 is a **N** and **S** route. Travelling **N** is more **NE**. Travelling **S** is more **SW**.

US1 MILE MARKER MM CHART

US1 Mile Markers **MM** are a relative location in reference to the number of miles north of Key West.

The business center of Key Largo is at about **MM 100.000**; therefore, about 100 miles.

The Florida DOT maintains rectangular green with white **MM** signs every mile on both sides of the highway. Generally, except Marathon, an addresses along US1 is the **MM** expressed as a four, five or six digit number.

For example, an address of 100511 Overseas Highway would be located at about **MM 100.511**

If the extreme right digit (least significant) number is an **even** number, it is on the west or gulfside.

If the extreme right digit (least significant) number is an **odd** number, it is on the east or oceanside.

Subtracting two **MM** gives the approximate number of miles between two known locations.

If the **MM** are getting smaller, one is traveling south or southwest. They are listed from south to north

Jewfish Creek Drawbridge **MM 107.200** has been replaced by a modern 65 foot concrete span.

Some entries are historical locations and may not physically exist.
